FOREWORD

The agriculture sector is considered as key in enhancing the economic growth of a country along with mitigating the concerns of food security. This sector is the main source of rural poverty alleviation and employment generation. The agricultural sector, contributing 24 percent in GDP and 37.4 percent in employment generation, ensures food security and provide raw material to the industrial sector. It is the main sector for social formation in our country.

Statistical data and information are crucial in attaining the national development goals and socio-economic development. Adequate, reliable, and accurate statistical data is required in economic planning, and analyzing the data facilitates in acquiring results of the present economic status and also in explicating the future outcomes. It provides the basis for the factors that shape development planning and decisions at the regional and district levels.

The publication “Crops Area & Production (Districts Wise)” comprises of latest district-wise data of Major and Minor crops including Food and Cash crops, Pulses and Oilseeds, Fruits, Vegetables, and Condiments statistics for the years 2022-23 and 2023-24. This publication will prove to be immensely helpful in facilitating the research work and will help government functionaries, academicians, and all those who are interested in the issues relating to the development of the Agriculture Sector.

I wish to appreciate the efforts made by the team who are directly or indirectly involved in the compilation of this publication, including the federal and provincial organizations, which positively assisted the Economic Wing to compile the publications.

Suggestions and comments for further improvement of this publication would highly be appreciated.

(Waseem Ajmal Chaudhary)
Secretary

Islamabad, January 30, 2025

Executive Summary

Pakistan, a predominantly agrarian economy, relies significantly on its agriculture sector. With a rich agricultural history dating back centuries, agriculture remains the backbone of Pakistan's economy, contributing 24 percent in GDP, 37.4 percent in employment, and export earnings. During Fiscal year 2023-24, the contribution of important crops recorded at 20.63 percent to value addition in agriculture sector and 4.97 percent to GDP. Other crops contributed 13.51 percent in value addition of agriculture sector and 3.25 percent in GDP.

The sector mainly comprises crops, livestock, and fisheries, with wheat, cotton, rice, maize and sugarcane being the major crops. Agriculture is highly dependent on the country's irrigation system, as most of the land is arid or semi-arid. In recent years, the sector has faced numerous challenges, such as water scarcity, climate change, and low productivity, which have negatively impacted the country's food security and economic growth. However, the government has implemented various initiatives, such as the Productivity Enhancement program for Wheat, Sugarcane, Oilseeds and Pulses which has significantly contributed in improving the sector's performance and addressing these challenges. Despite the obstacles, agriculture remains a vital sector for Pakistan's development, and the country has the potential to become a major food exporter in the region with the right policies and investments.

Agriculture supports industry and earns foreign exchange through exports and reduces poverty at national level. The development of agriculture depends on sound policies and plan based on empirical data. Ministry of National Food Security and Research has prepared its publication “Crops Area & Production (District wise) 2023-24”. This publication is enriched with data of 51 crops on the district level with indicators including area and production to facilitate the policy makers, researchers, academia and students dealing with Agriculture.

The production of major crops during 2023-24, such as wheat, cotton and rice has indicated considerable improvement compared to last year and has surpassed the production targets. On contrast, sugarcane and maize has indicated a decrease compared to last year. The details of the major crops are explained below:

Wheat:

Wheat is a major Rabi crop of the country. The wheat production during 2023-24 was estimated at 31.4 million tonnes against 28.16 million tonnes last year. The percentage change of production as compared to last year is 11.6 percent. During 2023-24, the area sown increased to 9.6 million hectares (6.6 percent) against last years of 9.0 million hectares. Wheat production has increased due to good weather conditions and timely snowing. The minimum support price in Punjab was 3,900 Rs/40 Kgs.

Rice:

Rice is an important food as well as cash crop. It is the second main staple food crop after wheat and a major export commodity. It contributes 0.6 percent in GDP and 2.5 percent value added in Agriculture. The production of Rice during this year estimated at 9.9 million tonnes increase by 34.8 percent than last year's

production of 7.3 million tonnes. The rise in rice production was due to increased area under cultivation, supported by higher rice prices and favorable monsoon.

Maize:

Maize is the third important cereal crop of Pakistan after wheat and rice, and it contributes 0.7 percent to GDP 2.9 percent in agriculture. Maize is cultivated as a multipurpose crop for food, feed and fodder. During 2023-24, maize was cultivated on an area of 1.6 million hectares showing a decrease of 4.5 percent over last year's 1.7 million hectares. Its production declined to 9.8 million tonnes witnessing a loss of 10.4 percent over 10.9 million tonnes last year.

Sugarcane:

Sugarcane is a high value cash crop of Pakistan and is of great significance for sugar related industries. It is cultivated mainly in Punjab, Sindh, and Khyber Pakhtunkhwa. During 2023-24, sugarcane cropped on 1.2 million hectares recorded a decrease of 10.5 percent compared to last year's sown area of 1.3 million hectares. The sugarcane crop production recorded at 87.6 million tonnes during 2023-24, down by 0.4 percent over last year (88.0 million tonnes). This decrease was mainly due to unfavorable weather conditions and non-availability of quality input.

Cotton:

Cotton crop are often referred to as the "white gold" of the country. Cotton is a major source of employment for millions of farmers and laborers, and it is a key raw material for the country's textile industry, and it contributes around 0.3 percent to GDP. During 2023-24, the cropped area increased to 2.4 million hectares (13.1 percent) against last year's 2.1 million hectares. Cotton production increased to 10.2 million bales (108.2 percent) against last year's 4.9 million bales.

Oilseeds, a diverse group of crops that include soybeans, rapeseeds, mustard, sesame, ground nuts, sunflower, canola, and others, play a fundamental role in global agriculture and human wellbeing. These seeds are rich sources of edible oils, proteins, and other valuable nutrients, making them essential components of our diet. Edible oil is Pakistan's largest food import commodity ranking third in the import list after petroleum products and machinery. Pakistan is dependent upon other countries to fulfill more than 90 percent edible oil requirement and spending a big amount of foreign exchange every year. The local production of edible oil is less than 10 percent of the country's requirements. The gap between production and consumption of edible oil is still increasing due to the increase in population and increase in per capita consumption of edible oil in our daily diet. In Pakistan, unlike other oilseed crops, the area under sesame increased by 53 percent from 259.92 thousand hectares in 2022-23 to 399.77 thousand hectares in 2023-24. The production of sesame during this year is estimated at 301.23 thousand tonnes increase by 97.73 percent than last year's production of 152.23 thousand tonnes. The rise in production was due to increased areas under cultivation and favorable weather conditions. The area under groundnut increased by 11 percent from 129.22 thousand hectares in 2022-23 to 142.86 thousand hectares in 2023-24. The production of ground nuts during this year is estimated at

120.93 thousand tonnes increase by 6 percent than last year's production of 114.38 thousand tonnes. This may be due to the implementation of the National Oilseeds Enhancement Project.

In Pakistan, pulses are grown on 5 percent of the total cropped. The area under major pulses including Gram, Mung, Mash and Masoor in the country is 1011.0 thousand hectares and the production is around 372.7 thousand tonnes. Gram contributes 78.8 percent, Mung contributes 19.9 percent, Masoor contributes 0.6 percent, and Mash contributes 0.7 percent in total production of pulses. The production of pulses is far less than the requirement and the balance is met through imports. Major import partner countries are Australia, Canada, Russia, Argentina, and Afghanistan.
