FORWORD

Agriculture is the mainstay of the economy and source of earning for majority of population in Pakistan. Agriculture supports industry, provides employment, earns foreign exchange and helps to reduce poverty. The development of the agriculture sector depends upon sound policy and plan based on empirical data. Ministry of National Food Security & Research (M/o NFS&R) has the mandate to achieve the foremost goal of national food security, endeavoring through incessant research and improved national policies. The collection and compilation of statistical data on the agriculture sector at national level is also the key function assigned to this Ministry. Since 1968 Economic Wing is compiling and publishing the Agricultural Statistics of Pakistan on yearly basis to facilitate researchers, academia and policy makers dealing with agriculture.

This publication is a part of concerted efforts to provide concrete basis for research in the field of agriculture and it contains data regarding production, consumption, prices, imports and exports of food grains. The best feature of 57th edition of this publication is its comprehensiveness that it provides all sorts of data relating to agricultural sector of the country up to June 2024 which includes area, production and yield of crops. The data for the earlier period commencing from 2006-07 through 2023-24 has also been provided for supporting time series analysis. It contains province-wise, crop-wise and other statistical data pertaining to the agriculture sector.

I express my deep appreciation for the Economic Consultant and his staff involved in the compilation and tabulation of this publication. The publication will prove beneficial to all relevant stakeholders.

Any suggestions for improving the scope of this publication will be appreciated.

(Waseem Ajmal Chaudhary)
Secretary

Islamabad
May,2025

INTRODUCTION

Since 1968, the Economic Wing of defunct Ministry of Food and Agriculture was publishing Agricultural Statistics of Pakistan on annual basis. This publication is widely used by the local and international organization for policy formulation, planning and research. Major objectives of this publication are to facilitate policy formulation, planning and research. The Economic Wing Ministry of NFS&R is undertaking this significant activity of presenting this publication “Agricultural Statistics of Pakistan 2023-24”.

Agriculture is the backbone of Pakistan’s economy and is an inevitable and integral part to ensure Food Security in the country. About 65% of the population is engaged in farming directly or indirectly through production, processing and distribution of major agricultural commodities. Agriculture contributes about 20 percent of our Gross Domestic Product (GDP), provides livelihood to about 65 percent of people living in rural areas and employs about 38 percent of the total national labor force. The agriculture sector is the major contributor in the overall export earnings of Pakistan. The share of food group alone in the total export of Pakistan for the year 2023-24 stood at 17.5 percent. Agriculture is equally important for industrial development.

This publication of Agricultural Statistics of Pakistan is aimed at providing area, production and also per hectare yield data about major and minor crops. The data is for the period from 2006-07 to 2023-24 to facilitate year-to-year comparison and analysis. Variety-wise data of major crops, i.e. cotton and rice is provided, while data of other crops is without any varietal differentiation. The data relating to fruit such as citrus, mangoes etc. and major condiments/vegetables such as onions and potatoes etc. have also been added.

It also contains land use statistics including the details of irrigated, non-irrigated areas, farm size etc. The data about agricultural inputs, i.e. improved seeds, fertilizers, water, pesticides, rainfall data and details of area covered by plant protection etc. are also given. The data relating to disbursement of agricultural credit by Commercial Banks, ZTBL, PPCBL and domestic private banks is also documented in this publication. The data pertaining to agricultural machinery, lift pumps, tube wells and tractors according to horsepower, farm size as well as private/public ownership etc is also part of this publication. Being integral part of agricultural system, the publication is consisting of data on livestock population in the country

along with estimated production of milk, meat, eggs and other livestock products etc. It also provides data about inland and marine fish production and details of fishing crafts. Part of the publication also provides information about forestry, rangeland, major forest products and value addition of various forestry products etc. The publication also covers trade statistics relating to major exports and imports of agricultural commodities. In addition, it provides details of procurement/support and intervention prices as well as wholesale prices of various important crops such as wheat, cotton, sugarcane and maize besides rates of diesel, electricity & petroleum products etc. The data provided on per capita availability of cereals, edible oils, meat, fish and milk along with estimates of GDP etc. add value to this publication.

It is important to mention that the crops data is collected through acreage surveys as well as sample village surveys by the enumerators who fill up a number of prescribed Performa's and submit to Provincial Crop Reporting Services. The accuracy of estimates is further cross checked and verified by joint inspection teams of Revenue and Extension Departments of Provincial Governments. These crops estimates are supplied to the PBS for compilation at Federal level. The estimates are submitted in three stages i.e. first, second and final estimates for the major crops. Reasons for increase/decrease in the production of major crops have been included to facilitate the data analyst. A summary table about area, production and yield of agricultural commodities has also been added in the publication for the years 2020-21 to 2021-22.

The Government policy is to ensure food security through sustainable agricultural development and balanced growth of food sector to meet growing population needs and also to generate agricultural surplus to enhance the export of agricultural sector, which would eventually lead to a healthy economy. It would only be possible if reliable data is available; which is the primary objective of this publication. The timely and prompt cooperation extended by all the concerned departments and organizations at federal and provincial level is well acknowledged with gratitude.

The publication is also available at M/o NFS&R's website www.mnfsr.gov.pk. Economic Wing M/o NFS&R may be contacted for any additional information/suggestions for improvements, in future endeavors.

WATER AVAILABILITY

Overall Water Availability at Farm Gate during Rabi and Kharif

Ground and Surface Water Availability at Farm Gate

LAND UTILIZATION

- ❖ **Geographical Area** is that area which has been surveyed and calculated by the Survey of Pakistan.
- ❖ **Total area reported/utilized** is the total physical area of the village/deh, tehsil, or district etc.
- ❖ **Area not available for cultivation/ Not for agriculture** is that uncultivated area of the farm which is under farm homestead, farm roads and other connected purposes and therefore not available for cultivation.
- ❖ **Culturable waste** is that uncultivated area which is fit for cultivation but was not cropped during the year under reference nor in the year before.

Cultivated area is that area which was sown at least during the year under reference or during the previous year.

Net Area Sown is that area which is sown at least once during the (Kharif & Rabi) the year under reference.

CROPPED AREA STATS

Distribution of Cropped Area 2023-24

Area under Rabi Crops 2023-24 ('000' ha)

Area under Kharif Crops 2023-24 ('000' ha)

AGRICULTURE GDP

MILK

Pakistan Total Buffalo Milk Production and Consumption

Note: 15% of total milk production is excluded as milk sucked by young animals, 5% is excluded as wastage in transportation. Only 5% of adult female sheep and 15% of adult female goats and 50% of adult female camels are milked for human consumption

Pakistan in international Market of Buffalo Milk

SOURCE OF CROPS DATA
AREA, PRODUCTION AND YIELD PER HECTARE

The area and production data in the following tables is based on the crops estimates supplied by the Crop Reporting Services of Provinces and compiled by the Ministry of National Food Security and Research (Economic Wing). Rounding of figures may result in slight difference.

Area below 50 hectares is denoted with symbol “a”

Production below 50 tonnes with symbol “b”

GEOGRAPHICAL AREA is that area which has been surveyed and calculated by the Survey of Pakistan

TOTAL AREA REPORTED is the total physical area of the village/deh, tehsil or district etc.

FOREST AREA is the area of any land classed or administered as forest under any legal.

enactment dealing with forests. Any cultivated area which may exist within such forest should be excluded (and shown under heading cultivated area).

AREA NOT AVAILABLE FOR CULTIVATION is that uncultivated area of the farm which is under farm home-steads, farm roads and other connected purposes and therefore not available for cultivation.

CULTURABLE WASTE is that uncultivated farm area which is fit for cultivation but was not cropped during the year under reference nor in the year before that.

CULTIVATED AREA is that area which was sown at least during the year under reference or during the previous year. Cultivated Area = Net Area sown + Current Fallow

CURRENT FALLOW is that area which is vacant during the year under reference but was sown at least once during the previous year.

NET AREA SOWN is that area which is sown at least once during (Kharif & Rabi) the year under reference.

AREA SOWN MORE THAN ONCE is the difference between the total cropped area and the net area sown.

TOTAL CROPPED AREA means the aggregate area of crops raised in a farm during the year under reference including the area under fruit trees.

Table 62																	
DISTRIBUTION OF CROPPED AREA																	
('000' hectares)																	
Year	Food Crops	%	Cash Crops	%	Pulses	%	Oilseeds	%	Vegetables	%	Condiments	%	Fruits	%	Others	%	Total

N.B. Vegetables include Potatoes.

Food Crops = Wheat, Rice, Jowar, Maize, Bajra and Barley.

Cash crops = Sugarcane, Cotton, Tobacco, S.beet, Jute and Guarseed, Sunhemp

Pulses = Gram, Mung, Mash, Masoor, Mattar, Other Kharif and Rabi Pulses.

Oilseeds = Rapeseed & Mustard, Sesamum, Groundnut, Linseed, Castorseed and other oilseeds.

Condiments = Chillies, Onion, Garlic, Coriander. Turmeric and Ginger

CONVERSION FACTORS

Weights

One pound (16. Oz)	=	0.45359 Kgs	=	0.48609 Seer.
One hundred weight (112 lbs.)	=	50.80208 Kgs	=	1.361 Maunds.
One ton (2240 lbs.)	=	1.01605 M. tons	=	27.22 Maunds.
			=	5.60/5.71 bales
			=	of jute/cotton
One tonne	=	0.984 Tons	=	26.792 Maunds.
Cotton bale (375 Lbs.)	=	170.09 Kgs	=	4.5571 Maunds
			=	0.1674 Long ton
1 Bushel per acre	=	67.253 Kgs. per hectare		
1 Bushel	=	0.73 Maund.		
	=	29.17 Seers.		
	=	60.00 Lbs.		

Length

One inch	=	25.3999 Millimeters		
One foot (12 inches)	=	0.3048 Meter		
One yard (3 feet)	=	0.9144 Meter		
One mile (1760 yards)	=	1.60934 Kilometers		

Square Measures

One square yard	=	Nine Square Feet	=	0.83613 Square Meter
One acre	=	4840 Square Yards	=	0.40468 Hectares
One square mile	=	640 Acres	=	258.99842 Hectare
One square kilometer			=	0.3861 Square Mile
One Hectare			=	2.4711 Acres
One Cubic Meter			=	2.4711 Acres/ (35.3147 Cubic Feet)

Liquid

One imperial gallon	=	4.5461 liters or 1.2 U.S gallons		
One U.S. gallon	=	3.7853 liters.		

GENERAL CONVERSIONS

<u>Divide</u>	<u>By Factor</u>	<u>To obtain</u>
Acres	2.4711	Hectares
Long ton	0.9842	M. tons
Cotton bales (375 lbs.)	5.973	Long tons
Cotton bales (375 lbs.)	5.879	M. tons
Maunds	26.79	M. tons
Price per 40 kgs.	1.0716	Price/maund
Yield kgs per hect.	92.2313	Yield maunds/acre.
Rice	0.666	Paddy
Cotton Lint	0.333	Seed Cotton

N.B.: - In case of vice versa multiply with the factor.
