MESSAGE

Horticulture sector has the prime importance in Pakistan Agriculture Industry. The horticulture sector is not only producing fruits and vegetables for local consumption but also earning a handsome amount of foreign exchange through export of fruits and vegetables produced in Pakistan. Pakistan is self-sufficient in production of staple foods, livestock and dairy, however, economic access and utilization persist as the major limiting factors for household-level food and nutrition security.

Present Government has accorded high priority to the development of agriculture to play a vital role in boosting national economy and ensuring food and nutritional security. The emphasis is also given to agriculture, livestock, research and development priorities with a focus on nutrient dense foods such as fruits, vegetables, legumes and animal source foods. Fruit, Vegetables and Condiments Statistics of Pakistan 2023-24 is valuable addition in the Ministry's Publications.

FOREWORD

Horticulture in Pakistan has emerged as an important sector contributing to the national agricultural GDP's share and produce large number of horticultural products to fulfill domestic demand of fruit and vegetables for ever increasing population. Pakistan is a major producer of fruits and vegetables and around 30 types of fruits and 34 types of vegetables are produced in the country throughout the year. However, most of the production is consumed in domestic markets. Production of citrus, mango, apple, melons, dates, guava, and apricot reflect strong domestic market demand for horticulture crops. Citrus fruit, primarily the mandarin variety. The highest production has reached, i.e Citrus fruit & Mango 2.3 and 2.1 million tons, the largest fruit crop group by volume and are major export revenue earner. According to latest figures Pakistan exported **927.5** thousand ton of fruit increased 47.5 percent, **Vegetables** 1261.7 thousand ton decreased 5.6 percent and **Condiments** 36.2 thousand ton, an increase of 66 percent from last year.
